Surfaces - Notes:

All surfaces may be porous or non-porous, with the exception of 'Clay', which is always porous. 1 Normally forms only the uppermost few millimetres of a court. 2 "Appearance" relates only to the form of the surface material and not other characteristics (e.g. colour). 3 Used only when the material itself forms the playing surface. When used as a base for other surfaces (e.g. acrylic), reference will be made only to the playing surface. 4 This term denotes a fact that include a fine critty material on the upperment (playing) layer, a g fact day

4 This term denotes a class of natural surfaces that include a fine gritty material as the uppermost (playing) layer, e.g. fast-dry.
